**Subject:** Proposed increase in UPCC RD membership dues

A 6% increase in member dues has been proposed. As this increase will negatively affect many membership categories I am requesting full publication of all evidence used to support this increase including historical cost data for all current member categories at UPCC and publication of all comparable membership data collected from Manatee and Sarasota private and semi private country clubs. In addition I am asking for full disclosure and clarification regarding the various membership categories at UPCC and an explanation of how the proposed increase in dues will affect each category.

In 2025 the UPCC RD published and supported approximately 15 different membership categories (see attached). These multiple categories have continued into 2026 and create inequities in terms of cost and access to RD activities. The attached document profiles the various membership categories published in 2025 and highlights the disparate advantages of the customized "boutique" membership categories that have developed over time and continue to date. There should be NO broad increase in annual member dues until the disparate and unfair membership categories are removed and fair and equitable policies put in place so that no homeowner member is disadvantaged.

Respectfully submitted, Jan Wyatt

Janet S. Wyatt, PhD, RN
