

Dale Otterman

I have lived in University Park for over 20 years and am a social member with a fitness pass. During that time, we were able to purchase UPCC which has been extremely beneficial to have that control and chart our own path. The club is the heart of the community, and a majority of our residents have voted to continue the improvement of these facilities. This will ensure that University Park continues to be a preeminent club in this area. I will work to implement the changes agreed upon, ensure we are on a good financial track, work to add value to our social memberships, and continue to improve communications throughout the community.

My involvement with the community includes the Fitness & Wellness Advisory Group for three years (currently Co-Chair), Warwick Gardens Neighborhood committee, Co-founder of Solo Connections and helped to run the last RD election. Outside of the community I am a Guardian ad Litem for children in the dependency court and a member of the League of Women Voters.

My business experience was in banking in the operational areas. I used my management and communication skills as the Vice President of Customer Information Services. Later I was the Founder and Co-Director of ParentPower a not for profit trying to get the parents of school aged children involved with their children's education. I used these same skills in my volunteer work as President of the elementary, middle, and high school PTA/PTO organizations. I served on the School Board and spent many hours trying to improve our public schools.

I have always felt that if I benefitted from a group or organization, I should do my part and get involved. I have done that here and now would like to join the RD board and continue our path of improvement and success.

I am a hard worker, organized, a good communicator and willing to commit the hours necessary to do this job. Please give me the opportunity to be a part of the board and work for our continued success.
